## Glossary

| Term                            | Definition                                                                                                         |
|---------------------------------|--------------------------------------------------------------------------------------------------------------------|
| <b>Job Finder</b>               | A Laravel-based job portal that facilitates job listings, candidate applications, onboarding, and user management. |
| <b>Admin Dashboard</b>          | An interface for administrators to manage users, jobs, documents, and analytics.                                   |
| <b>Candidate</b>                | A job seeker applying for job posts listed within the system.                                                      |
| <b>Document Library</b>         | A repository where HR/Admin upload reusable documents (e.g., company policies, eligibility forms).                 |
| <b>Onboarding</b>               | A post-hiring process where candidates submit required documents and acknowledge company policies.                 |
| <b>Resume</b>                   | A candidate-uploaded file containing their professional summary and qualifications.                                |
| <b>Company Policies</b>         | Official documents candidates must review and acknowledge during onboarding.                                       |
| <b>Assigned Documents</b>       | Documents assigned by Admin/HR that candidates must complete or acknowledge.                                       |
| <b>Emergency Contact Module</b> | A section where users input emergency contact details and provide consent.                                         |
| <b>My Jobs</b>                  | A dashboard view where candidates track applications and their statuses.                                           |
| <b>Analytics Dashboard</b>      | A reporting interface showing traffic, trends, and performance of job postings.                                    |
| <b>Certification Documents</b>  | Documents uploaded by candidates showing verified skills with expiration tracking.                                 |

# JOB PORTAL Documentation

## 1. Overview

The **JOB PORTAL** is a Laravel-based web application designed to manage job postings and candidate applications. The portal provides features for:

- **Admin Management:** Creating, updating, and filtering job listings.
- **User Profile Management:** Creating and updating user profiles, including file uploads (e.g., resumes, profile pictures).
- **Candidate Applications:** Allowing candidates to apply for jobs and storing their application statuses.
- **Graphical Analytics:** Visualizing job posting trends and candidate application distributions using bar and donut charts.
- **Security and Validation:** Integration with Google reCAPTCHA (v2) for login and extensive request validation for data integrity.
- **File Storage:** Handling file uploads (profile pictures and resumes) via Laravel's Storage system.

## 2. Architecture & Technology Stack

### 2.1. Backend Framework

- **Laravel:**  
The application leverages Laravel's elegant syntax, built-in validation, routing, and Blade templating engine. Laravel's Eloquent ORM is used for database interactions, and model casting simplifies data management.

### 2.2. Frontend Framework & Libraries

- **Bootstrap 5:**  
Bootstrap is used for responsive design and UI components. The portal incorporates Bootstrap's grid system, navigation bars, forms, and modals to ensure a consistent look and feel across devices.
- **FontAwesome:**  
Icons from FontAwesome enhance the UI, especially in the navbar and buttons.
- **JavaScript & Custom Scripts:**  
Custom scripts handle UI enhancements like custom dropdown toggles for multi-select fields (e.g., Job Location and Benefits), as well as managing the navbar toggle behavior on mobile devices.

## 2.3. File Storage

- **Laravel Storage System:**

File uploads, such as profile pictures and resumes, are managed via Laravel's Storage system. Uploaded files are stored in `storage/app/public`, and a symbolic link (`php artisan storage:link`) ensures that these files are accessible via the `public/storage` path.

## 3. Key Features

### 3.1. Job Management

- **Job Listings:**

Admin users can create, update, and filter job postings. Jobs include details such as title, description, location (with multi-select options for multiple states), job type, and additional compensation fields (supplement pay, benefits, and pay range).

- **Job Details:**

Each job listing is accessible via a unique URL (using a UUID), and job details include structured information that supports responsive design. The column is styled with a fixed width and ellipsis to handle long lists of locations gracefully.

### 3.2. User Profile Management

- **Profile Creation & Update:**

Users can create and update their profiles. This includes personal details, contact information, and the ability to upload profile pictures.

- **File Uploads & Preview:**

Users can change their profile picture using an interactive upload field. The preview feature uses JavaScript to display the selected image before upload, while the stored file path is mapped correctly to ensure accessibility.

### 3.3. Candidate Applications

- **Application Process:**

Candidates can apply for jobs directly through the portal. Application statuses are tracked and stored, enabling both candidates and administrators to monitor the progress of applications.

### 3.4. Graphical Analytics

- **Visual Charts:**

The portal includes graphical analytics—such as bar and donut charts—to visualize job posting trends and candidate application distributions. For instance, containers for charts are styled (with adjustable heights) to accommodate dynamic data visualization.

### 3.5. Security & Validation

- **Extensive Request Validation:**

Every form submission is safeguarded using Laravel's robust validation mechanism. Fields such as job

titles, location arrays, numeric ranges for compensation, and file uploads are validated to ensure data integrity.

- **Google reCAPTCHA Integration:**

For enhanced security, particularly during login, Google reCAPTCHA (v2) is integrated to prevent spam and automated abuse.

### 3.6. Role-Based Dashboard Access

- **Admin vs. User Interfaces:**

Depending on the authenticated user's role, the navbar and dashboard links dynamically adjust. Admin users have access to the Admin Dashboard, inactive jobs, and inactive users, while regular users see their respective user dashboards.

## User Perception:

### Sign In (Login) Page

#### Overview

The **Sign In** page allows users to log into their accounts securely using their registered email and password. Additional security measures, such as CAPTCHA verification and Google Sign-In, are implemented.

#### Fields & Features

- **Email Address\*** – Enter a valid email registered in the system.
- **Password\*** – Enter the correct password associated with the email.
- **Google Sign-In** – Users can log in using their Google account without manually entering credentials.
- **CAPTCHA Verification** – Users must complete a **Google reCAPTCHA v2** challenge to prevent bot logins.
- **Forgot Password** – If a user forgets their password, they can click "**Forgot Password?**", enter their email, and receive a **password reset link via email**.

#### Validation & Security

- ✓ CAPTCHA prevents spam and bot logins.
- ✓ Secure password hashing for stored credentials.
- ✓ Email validation to ensure correct credentials.

## Sign Up (Registration) Page

### Overview

The **Sign Up** page allows new users to create an account by providing essential personal and contact details. After successful registration, users can log in using their credentials.

### Fields & Features

- **First Name\*** – Enter the user's first name.
- **Last Name\*** – Enter the user's last name.
- **Email Address\*** – Provide a valid email for account creation.
- **Phone Number\*** – Enter a valid phone number (e.g., +1 123 456 7890).
- **Good Time to Call** – Select a preferred time for communication.
- **Time Zone** – Choose a relevant time zone (e.g., Eastern, Pacific).
- **Password\*** – Set a secure password for login.
- **Confirm Password\*** – Re-enter the password to ensure accuracy.

### Validation & Security

- ✓ Strong password validation (minimum characters, special symbols).
- ✓ Unique email verification to prevent duplicate registrations.
- ✓ Secure user authentication using encrypted credentials.

## JOB PORTAL Index Page

### 1. Overview

The **Index Page** is the home page of the Job Portal where all live (active) job listings are displayed. Users can browse available job postings, apply filters to refine their search, and click on a job to view detailed information.

This page is accessible to both **logged-in** and **guest** users. However, applying for a job may require authentication.

### 2. Features & Functionality

#### 2.1. Job Listings Display

- The page displays a **list of active jobs** with key details:
  - **Job Title** (Clickable – redirects to job details page)
  - **Company Name**
  - **Location (City, State)**
  - **Job Type** (e.g., Full-time, Part-time, Contract)
  - **Date Posted**
- **Sorting & Pagination:**
  - Jobs are displayed in reverse chronological order (latest first).
  - The page uses **Laravel Pagination** to load jobs in multiple pages instead of displaying all at once.

#### 2.3. Job Details Navigation

- Each job listing includes a **View Details** button or a clickable **Job Title**.
- Clicking on a job redirects to the **Job Details Page**, where users can view complete job information.

### Conclusion

The **Index Page** serves as the main hub where users browse and search for job listings. With powerful filtering capabilities, a responsive UI, and a secure backend, it provides an optimal job-searching experience.

## Job Details Page

### 1. Overview

The Job Details Page provides a comprehensive view of a selected job listing. It includes job-specific details such as the job description, required skills, salary range, benefits, and company information. Users can apply for the job, like/save it for later viewing, and check the job's status (Open/Closed).

This page is accessible to all users, but applying for a job requires authentication.

### 2. Features & Functionality

#### 2.1. Job Information Display

The page presents complete details about the job, including:

- Job Title (Displayed at the top)
- Company Name
- Job Location (City, State)
- Job Type (Full-time, Part-time, Remote, Contract, Internship)
- Salary Range (If provided by the employer)
- Date Posted (Relative date, e.g., "Posted 3 days ago")
- Status (Open or Closed)

##### 2.1.1. Job Description Section

- Full job description outlining responsibilities and expectations.
- Formatted text with headings, bullet points, and lists to improve readability.

##### 2.1.2. Required Skills Section

- List of skills necessary for the job.
- Skills displayed as badges or labels (e.g., PHP, React.js, Laravel).

##### 2.1.3. Benefits Section

- Displays perks offered by the employer (e.g., health insurance, paid leave, remote work options).

## 2.2. Job Application Functionality

The page includes an Apply Now button, allowing users to submit their application.

### Application Workflow:

1. If the user is logged in, they can click Apply Now.
2. A form appears for uploading a resume (if not already uploaded).
3. Users can submit additional details (e.g., cover letter, Questions).

### Validation & Security:

- Resume file size/type validation (PDF/DOCX only, max 2MB).
- Prevent duplicate applications (**check if the user has already applied**).
- Redirect unauthenticated users to the login page before applying.

## 2.3. Job Like & Save Feature

- Users can like/save a job by clicking a heart/like icon.
- Saved jobs are stored in the My Jobs section for later review.
- Clicking again removes the job from the saved list.

## 2.4. Job Status Indicator

- If the job is open, display a green "Open" label.
- If the job is closed, display a red "Closed" label with a message:
  - This job is no longer accepting applications.

## 2.5. Dynamic Job Cover Photo

- The cover photo for each job is **dynamic** and can be set by the employer.
- If no custom cover photo is provided, a **default placeholder image** is displayed.

## Apply for a Job

### 1. Overview

The **Apply for a Job** page allows users to submit their job applications. This page includes fields for uploading a **resume**, an **optional cover letter**, and **answering any additional questions** asked by the job creator.

A smooth and **user-friendly interface** ensures candidates can submit their applications efficiently, with **file validation and real-time error handling** to improve the user experience.

### 2. Features & Functionality

#### 2.1. Page Structure

The **Apply for a Job** page consists of:

1. **Resume Upload Section**
  - Allows users to **upload a resume (PDF/DOCX only)**.
2. **Optional Cover Letter Section**
  - Users can upload or type a **cover letter**.
3. **Additional Questions Section (If Applicable)**
  - If the employer has included additional questions, they are displayed here.
  - Users must answer **required** questions before submitting.
  - Question types:
    - **Short Answer** (e.g., "What is your expected salary?")
    - **Multiple Choice** (e.g., "Are you open to relocation? Yes/No")
    - **Dropdown Selection** (e.g., "How many years of experience do you have?")
4. Before allowing submission, the system **checks job availability**:
  - Is the job still active?** (Admin has not deactivated it)
  - Has the job expired?** (Published date has not passed)
  - Has the employer removed the job?**

If any of these conditions **fail**, the application **cannot be submitted**, and the user sees an alert.
5. **Submit Button**
  - Submits the application after validating all fields.
  - Disabled until all **mandatory fields are filled**.

## User Dashboard

The **User Dashboard** is a centralized section where job seekers can manage their **applications, profile**, and **liked jobs**. This section includes:

- **My Jobs:** View all applied jobs with dynamic application status.
- **User Profile:** Manage personal details and upload a profile picture.
- **Liked Jobs:** View and manage liked job listings.

## 2. Dashboard Sections & Functionalities

### 2.1. My Jobs

The **My Jobs** page provides an overview of all jobs that the user has applied for.

#### Key Features:

**Dynamic Application Status:** Displays real-time updates on the job application progress, including:

- **Pending:** Application submitted but not reviewed.
- **Reviewed:** Employer has seen the application.
- **Shortlisted:** Candidate is shortlisted for further process.
- **Rejected:** Application is declined.
- **Consider for an interview:** Application is considered for an interview.
- **Hired with Date :** User has been selected.

#### Job Details Display:

- **Job Title** (Clickable to view full job details).

#### Application Tracking:

- Users can track their **job application progress** without needing to contact employers.

The screenshot displays the SoluComp User Dashboard. The top navigation bar includes the SoluComp logo, a welcome message for David, and links to Home, Dashboard, Emergency Info, On-Board Process, and Logout. The left sidebar contains links for My Jobs, Profile, and Liked Jobs. The main content area, titled 'Jobs Applied For', features a table with 9 rows of job applications.

| # | Job Title            | Company  | Application Status |
|---|----------------------|----------|--------------------|
| 1 | Site technician      | SoluComp | Hired - 4/18/2025  |

## 2.2. User Profile

The **User Profile** section allows users to manage their personal and professional details.

### Key Features:

**Profile Information:** Users can update:

- **First Name & Last Name**
- **Email Address**
- **Phone Number**
- **Location (City, State, Country, Zip, Timezone)**

### Resume Management:

- Users can **upload/update** their resume.

### Profile Picture Upload:

- Users can **upload a profile picture** for their job applications.
- Supported formats: **JPG, PNG** (Max 2MB).
- **Live Preview** before saving.

### Account Security:

- Option to **change password**.

## Update Profile

|                                                                              |                                                                        |

**Upload New Resume**  
Accepted formats: PDF, DOC, DOCX

|                                                             |                                                                    |
|-------------------------------------------------------------|--------------------------------------------------------------------|
| <b>Employee Details</b>                                     |                                                                    |
| <b>Personal Address</b><br><input type="text" value="USA"/> | <b>Business Phone</b><br><input type="text" value="+12345678901"/> |

**Uploaded Resume**  
 No resume uploaded.

## 2.3. Liked Jobs

The **Liked Jobs** page allows users to keep track of jobs they are interested in.

### Key Features:

- **Job Listings:** Displays all jobs the user has liked by clicking the "Like" button on the **Job Details** page.

### Quick Access:

- Users can **easily revisit** jobs they might want to apply for later.
- Click on any Details button to **view full job details**.

The screenshot displays the SoluComp User Dashboard. At the top, there is a navigation bar with the SoluComp logo and a welcome message 'Welcome, David'. The navigation bar includes links for Home, Dashboard, Emergency Info, On-Board Process, and Logout. The left sidebar contains a 'User Dashboard' menu with options for My Jobs, Profile, and Liked Jobs (which is currently selected). The main content area is titled 'Liked Jobs' and features three job listings:

| Job Title        | Company  | Email                       | Action                   |
|------------------|----------|-----------------------------|--------------------------|
| Ai Engineer      | SoluComp | meta-hr@mail.com            | <a href="#">View Job</a> |
| Site technician  | SoluComp | aliarslanofficial@gmail.com | <a href="#">View Job</a> |
| Mobile Technican | SoluComp | solucomp@yahoo.com          | <a href="#">View Job</a> |

## Emergency Contact Module

The **Emergency Contact Module** allows employees to provide verified emergency contact details directly after login. This information is securely stored and becomes accessible to Admin and HR users under the employee's profile for use during emergency situations.

### Access and Purpose

- Displayed to all employees upon login if emergency contact details have not been submitted.
- Accessible anytime via the **"Emergency Contact"** section in the user dashboard.
- Designed to collect and store up to **four emergency contact entries** per employee.

### Contact Entry Requirements

Employees are prompted to complete the following for each emergency contact (up to four contacts):

- **First Name**
- **Last Name**
- **Phone Number**
- **Email Address**
- **Relationship**
  - Predefined relationship options include:
    - Spouse
    - Parent
    - Child
    - Sibling
    - Friend
    - Other

### Consent Section

At the end of the emergency contact form, a **Consent Form** section is shown to the employee:

#### Consent Statement:

"I, **[Employee's Full Name]**, authorize **SoluComp** and its subsidiaries to contact the individuals listed above in case of an emergency. I have informed these individuals that their names and contact details have been shared with SoluComp as emergency contacts and have received their consent to be contacted if an emergency arises."

#### Validation Requirements:

- The employee must **type their full legal name** exactly as it exists in the system.

- Validation ensures no alternate name is accepted.
- The employee must **check a confirmation box** that states:

“I confirm that the information provided is accurate and I consent to the terms stated above.”

- Only after both actions (typing full name and checking the box) are completed, the “**Submit Emergency Contact Information**” button becomes active.

### **Editing Emergency Contacts**

- Employees can **return to the Emergency Contact module** to edit or update their submitted details at any time.
- Updates are version-controlled and overwrite previous entries after confirmation.

### **Admin & HR Access**

- Admins and HR users can **view emergency contact details** directly on the **Employee Detail Page**.
- Emergency contact information is displayed in a **dedicated section** under the employee's profile.
- All data is read-only from the Admin/HR side and cannot be edited by anyone except the employee.

Welcome, David

### Consent

I am, **David willy**, authorize SoluComp and its subsidiaries to contact the individuals listed above in case of an emergency. I have informed these individuals that their names and contact details have been shared with SoluComp as emergency contacts and have received their consent to be contacted if an emergency arises.

Type in Your Full Name

☒ I confirm that the information provided is accurate and I consent to the terms stated above.[Submit Emergency Contact Information](#)

## OnBoardProcessModule

The **OnBoardProcessModule** is a self-service onboarding interface available to users **only after they are hired** for a specific job position. It allows hired candidates to review, upload, and manage required documents, track onboarding progress, and interact with assigned company policies.

### Access Control

- Accessible **only if the user has at least one job application with status = “Hired.”**
- Candidates without a “Hired” status will not be able to view or interact with this module.

### Job-Based Document Filtering

At the top of the OnBoardProcessModule:

- A **dropdown filter** lists all job titles the user has applied to.
- Upon selecting a job (e.g., *React Developer* or *Angular Developer*), the **below sections load documents and data specific to the selected job.**
- Documents related to other job applications are **not displayed.**

### Upload Documents Section

- Candidates can upload documents as requested by Admin or HR.
- Example uploads: Government ID, Certifications, Tax Forms, etc.
- Each uploaded file requires the user to select a **document category**:
  - General Document
  - Certification
  - Other (custom if allowed)

## Onboarding Status & Decline Option

- The **current onboarding status** is displayed on the page.
- This status is **managed and updated by Admin or HR**.
- Users have the option to **Decline Onboarding**, which triggers:
  - A **reason field (optional)** for declining.
  - On submission, the user's ability to upload or delete documents is **revoked**.
  - The decline status becomes visible to Admin/HR on their respective onboarding dashboards.

## Progress Tracker

- A **visual progress bar** is displayed at the top.
- Tracks:
  - Uploaded & accepted documents
  - Acknowledged company policies
- Example: If 5 documents are assigned and 3 are submitted & accepted + policy is acknowledged → **70% completion**
- **10% of the score is reserved for company policy acknowledgment**

## Document Management Overview

Below the upload section, four tabs provide organized access to onboarding materials:

### 1. General Documents

- Displays all documents **assigned to the user by Admin or HR** for the selected job.
- Includes due dates, status (Pending, Accepted, Rejected), and upload instructions.

## 2. My Uploads

- Lists all documents the candidate has uploaded.
- Includes file name, category, status, and upload date.

## 3. Company Policies

- Displays all company policies **assigned by Admin/HR** for acknowledgment.
- When accessed for the first time, a **modal popover** appears mid-screen:
  - Shows full policy content
  - Requires user acknowledgment (checkbox + confirm)
  - Until acknowledged, this popover appears each time the user visits the module

## 4. My Certifications

- Allows candidates to upload their own certification documents.
- Each upload requires:
  - Document title
  - Certification category
  - Expiration date (if applicable)

## Document Upload Validations

- All uploads require:
  - Document type/category selection
  - Job context (derived from dropdown)
- Uploads without required fields are blocked.

## Onboarding Completion Celebration

- When onboarding progress reaches **100%**, a **visual celebration** is triggered:
  - **Confetti/particle animation** using a JavaScript library (e.g., tsParticles or canvas-confetti)
  - A **success popover** appears.
- This celebration is shown once upon completion.

Document Management Guide

General Documents

Documents assigned by SOLUCOMP that require your attention. Review, complete, and upload these documents.

My Uploads

Documents you've uploaded appear here. Select the appropriate category when uploading to ensure proper classification. Document status (Approved, Rejected, or Pending) is visible on each document. You can view detailed feedback by clicking on the Feedback when available.

Company Policies

Official SOLUCOMP policies requiring your acknowledgment. Review each document carefully before acknowledging.

Note: Your onboarding status is visible in the 'Onboarding Status' dropdown menu. You may decline the onboarding process if necessary, but please be aware that this action **cannot be undone**.

No Documents Found

You don't have any documents yet.

## Admin Perception:

The **Admin Panel** provides advanced management tools to oversee **job postings, candidates, and analytics**. Admins can **monitor job trends, manage job postings, track candidate applications, and handle inactive users** efficiently.

## Admin Dashboard Overview

The **Admin Dashboard** provides a comprehensive graphical representation of jobs and applicants.

### Graphs & Charts

#### 1. Bar Chart (Job Posting Trends)

- Displays the monthly distribution of jobs based on their status:
  - Active Jobs
  - Paused Jobs
  - Closed Jobs

#### 2. Donut Chart (Application Status Distribution)

- Displays candidate statuses across all jobs and individual jobs:
  - Hired
  - Interviews
  - Rejected
  - Pending
  - Shortlisted
  - Resume Reviewed

#### 3. Line Chart (Application Trends by Month)

- Displays the **total number of applicants** who applied during the current month.
- Allows the admin to **filter by month** to view historical application trends.

#### 4. Analyze Trends Feature

- Includes a **"Select Month" filter** for the admin to choose a specific month and display relevant data in the graph.

## Trends:

# Job Portal Analytics Module

## Overview

The Analytics Dashboard provides comprehensive insights into user interactions with the job portal. This documentation outlines the key features and functionalities available on the analytics page.

## Key Features

### User Visit Analytics

The system tracks and displays detailed information about how users interact with the job portal:

Page Visit Tracking : Records visits to different page types (job listings, job details, search pages)

User-specific Analytics : Displays visit counts for individual users with visualization

Pagination : Implements custom pagination for better navigation through user visit data

### Job Performance Metrics

Most Visited Job : Identifies and displays the job posting receiving the highest number of views

Most Applied Job : Shows which job posting has received the most applications

Conversion Rate : Calculates and displays the ratio of applications to job views

### Geographic Insights

Most Visited Location : Displays the geographic region with the highest number of visitors

Most Applicants Location : Shows which geographic region has submitted the most job applications

Most Searched Location : Tracks which locations users are searching for most frequently

### Search Analytics

Most Searched Terms : Identifies the most common search terms used by job seekers

Search Patterns : Analyzes and displays trends in user search behavior

### **Filtering Capabilities**

The dashboard includes robust filtering options:

Job-specific Filtering : Filter analytics by specific job postings

Location Filtering : Filter data by geographic location

Custom Date Ranges : View analytics for specific time periods

### **Comparative Analytics**

Month-over-Month Comparison : Compares current month metrics with previous month

Percentage Change Indicators : Shows growth or decline in key metrics

### **Visual Representations**

Progress Bars : Visual representation of relative visit counts

Charts : Bar charts showing comparison between different metrics

Color-coded Indicators : Different colors represent different levels of performance

### **Google Analytics Integration**

The job portal also integrates with Google Analytics for enhanced tracking and analysis:

### **Implementation Details**

Global Site Tag : Implements Google Analytics 4 tracking code in the application layout

Event Tracking : Captures custom events for job views, applications, and searches

User Journey Analysis : Tracks the complete user journey from initial visit to job application

Bounce Rate Monitoring : Analyzes bounce rates for different sections of the job portal

Session Duration : Measures how long users spend on different pages

© All Rights Reserved SOLUCOMP - A Solution Company

## Manage Jobs (Job Control Panel)

Admins have complete control over all job postings with various filtering and management options.

### Job Listings & Filtering

- View all jobs categorized as Closed, or Pending.
- Filter jobs dynamically by:
  - Job Status (Paused, Closed, Active, Pending, etc.)
  - Search by Job Title (via search bar or dropdown selection)
  - Filter by States (specific job locations)
  - Starred Jobs (Admins can "star" jobs to mark important listings)

### Job Actions

Admins can:

- Change Job Status (Publish, Pause, Close).
- Delete Jobs permanently.
- Edit Job Details (Update description, requirements, etc.).
- Generate Shareable Job Links for external promotion.
- View Job Applications (Check how many candidates have applied).

The screenshot shows the SoluComp Admin Dashboard. The top navigation bar includes links for Home, Admin Dashboard, Document Library, Job Analytics, Paused Jobs, Inactive Users, and Logout. The sidebar on the left lists various management options. The main content area is titled 'Manage Jobs' and shows a table of active job listings. The table has columns for Job Title, Ref #, Candidates, Salary, Date Posted, Email, and Job Status. Two job listings are displayed, both for 'Telecommunication Wireless Field Technician III - Columbus, Ohio'. The first listing has 3 candidates and was posted 2 weeks ago. The second listing has 1 candidate and was also posted 2 weeks ago. Both listings show a salary range of \$25.00 - \$35.00 and an email address of jobs2@solucomp.com.

| Job Title                                                         | Ref #                                | Candidates | Salary            | Date Posted | Email              | Job Status |
|-------------------------------------------------------------------|--------------------------------------|------------|-------------------|-------------|--------------------|------------|
| Telecommunication Wireless Field Technician III - Columbus, Ohio  | 65ab573c-695a-4ccc-a03b-75f4d655c164 | 3 Active   | \$25.00 - \$35.00 | 2 weeks ago | jobs2@solucomp.com | Publish    |
| Telecommunication Wireless Field Technician III - Cleveland, Ohio | 9cfc91a0-45fa-487d-b1d3-6034a3786044 | 1          | \$25.00 - \$35.00 | 2 weeks ago | jobs2@solucomp.com | Publish    |

## Manage Candidates

The Manage Candidates section enables admins to efficiently track and manage all applicants who have applied for various job postings. Admins can view candidate details, update application statuses, provide reasons for hiring or rejection, and filter candidates based on multiple criteria.

### Candidate Management Features

#### Candidate Listing

Admins can view a structured list of all applicants with the following details:

- Candidate Name
- Email Address
- Applied Job Title
- Application Status (Pending, Rejected, Hired, etc.)

## **Candidate Actions**

### **1. Update Candidate Status**

- Admins can update the application status of candidates, choosing from:
  - Pending
  - Rejected
  - Hired
  - Considered for Interview
  - Resume Reviewed
  - Shortlisted

### **2. Add Rejection or Hiring Reasons**

- If a candidate is hired or rejected, the admin can provide a specific reason for the decision.

### **3. Manage Candidate Skills**

- Admins can add skills to each candidate profile, ensuring a clear match between the job's required skills and the applicant's qualifications.

### **4. View Candidate Details**

- By clicking on the candidate's name or details button, the admin can access full profile information, including skills, resume, and past applications.

### **5. Delete Candidate Resumes**

- Admins can remove resumes from the system if necessary.

## **Filtering & Search Options**

Admins have powerful filtering tools to quickly find the right candidates:

### **Filtering Options**

- By Application Status – Filter candidates based on status (Pending, Hired, Rejected, Considered for Interview, Resume Reviewed, Shortlisted).
- By Skills – Show only candidates who match specific skill sets.
- By Location – Filter candidates based on their city or zip code.
- By Job Title – Show candidates who applied for a specific job.

### **Search Options**

- By City or Zip Code – Quickly locate candidates based on geographical location.
- By Candidate Name – Find a specific candidate by entering their name.

### **Sorting Options**

- Sort candidates by application date, status, or relevance.

## Assigned Documents

The **Assigned Documents** feature allows Admins or HR personnel to send important documents and policies to hired candidates for completion or acknowledgment.

### Access Control

- The **Assigned Documents** option becomes **enabled only when a candidate's status is marked as "Hired."**

### Functionality

- Admins/HR can assign documents that:
  - Require candidates to **fill out and return** (e.g., forms, declarations).
  - Are to be **read and acknowledged**, such as **company policies**, compliance statements, or onboarding guidelines.
- All assigned documents are made available to the candidate through their portal, with clear labels for completion or acknowledgment.

The screenshot displays the SoluComp Admin Dashboard with a modal window titled "Assign Documents" open. The modal contains a search bar, tabs for "General Documents" and "Company Policies", and a table of documents. The table has columns for Title, Category, Type, and Size. Below the table, there is a "Read Only" checkbox with a description and two buttons: "Close" and "Assign Documents".

| Title                                               | Category               | Type | Size     |
|-----------------------------------------------------|------------------------|------|----------|
| <input type="checkbox"/> Assigned Tools             | Assigned_tools         | PDF  | 10.2 MB  |
| <input type="checkbox"/> Company-Assets             | Company_assets         | PDF  | 85.7 KB  |
| <input type="checkbox"/> Vehicle Usage Consent form | Vehicle_usage          | PDF  | 411.1 KB |
| <input type="checkbox"/> Employment Eligibility     | Employment_eligibility | PDF  | 2.4 MB   |

☐ **Read Only** (With this candidates can acknowledge they have read and understood the document by providing their consent) Close Assign Documents

## Onboarding Page

The **Onboarding Page** is a centralized module designed to help Admins and HR manage the post-hiring documentation and policy acknowledgment process for each candidate. It provides complete visibility into personal information, document statuses, candidate uploads, and onboarding progress.

### Access and Visibility

When an **Admin or HR** clicks on the **Onboarding** button for a "Hired" candidate, the following data and sections are presented:

#### Candidate Details (Read-Only)

- Full Name
- Email Address
- Phone Number(s)
- Applied Job Title
- Profile Photo (display only, not editable)

### Assigned Document Sections

The assigned documents are shown in two clearly separated sections:

#### 1. General Documents

- All documents assigned by Admin or HR for completion, signing, or uploading (e.g., ID proofs, tax forms, agreements).
- Candidates must upload documents in response to each assignment.

#### 2. Company Policies

- Documents that require acknowledgment (e.g., Code of Conduct, Leave Policy).
- Acknowledged documents are marked with an **"Acknowledged"** badge on the top-left corner of each item.
- A candidate can acknowledge a document with a single click.

- Policy acknowledgment contributes to the overall onboarding completion score.

## Candidate Upload Section

A **Dedicated Upload Area** allows candidates to submit files corresponding to assigned documents.

- Uploaded documents are listed along with their status: **Pending, Accepted, or Rejected**.
- Each upload can be reviewed by Admin/HR.

## Admin/HR Actions

Admins and HR users can manage submitted documents using the following options:

- **Accept or Reject** a candidate's uploaded document.
- If **Rejected**, an optional **comment box** appears for the Admin/HR to provide specific feedback (e.g., "Please re-upload with correct signature" or "This section is incomplete").
- Rejected documents do **not** count toward onboarding progress.
- **Delete** any **uploaded** documents from candidates if necessary.
  - **Note:** Only candidate-uploaded documents can be deleted. **Assigned documents** (by Admin/HR) can only be **unassigned**, not deleted.

## Onboarding Progress Tracker

At the top of the onboarding page, a **Progress Bar** visually represents the completion percentage.

- Calculated based on:
  - Total assigned documents
  - Number of accepted uploads
  - Acknowledgment of company policies
- Example:

- If 5 documents are assigned and 3 are submitted & accepted: **60% complete**
- **10% is reserved** for policy acknowledgment — if unacknowledged, progress is capped (e.g., 90% max).

### Onboarding Status Dropdown

Admins/HR can update the **Onboarding Status** via a dropdown:

- Status options include:
  - **Pending**
  - **In Progress**
  - **Completed**
- Once documents are assigned, the system automatically sets onboarding status to **Pending**.
- Admin/HR may manually change it to **Completed** upon review.
- The **current status is visible to the candidate** on their onboarding dashboard.

## Manage Employees

The **Manage Employees** page allows Admins and HR personnel to view, manage, and track the records of employees whose **onboarding has been completed**. The page includes two distinct sections: **Active Employees** and **Terminated Employees**, along with detailed employee profiles containing personal, financial, emergency, and compliance data.

### Employee Listing

- The page lists employees in a structured table format.
- Two filter tabs are available:
  - **Active Employees**: Displays employees currently employed and active.
  - **Terminated Employees**: Displays employees whose status is marked as terminated.
- A **Search bar** allows filtering employees by name, email, or other identifiers.
- Clicking on an employee in either tab navigates to their **Employee Detail Page**.

### Employee Detail Page

The detail page is organized into multiple structured sections, each handling a specific aspect of employee data.

#### 1. Personal Information

Displayed in a read-only format:

- Full Name
- First Name, Last Name
- Personal Email
- Employment Status: **Active / Terminated**
- **Termination Date** (visible if status is Terminated)
- Profile Photo

## 2. Financial & Compensation Information

This section includes sensitive employee compensation details:

- Salary
- Pay Cycle
- Per Diem Allowed (Yes/No)
- Per Diem Rate
- Bank Name
- Bank Deposit/Account Number
- Bank Account Type (e.g., Savings/Checking)
- Social Security Number
- Driving License Number
- Direct Deposit

### Encryption Note:

The following fields are **stored and displayed securely using encryption**:

- Bank Name
- Bank Account Number
- Social Security Number
- Driving License Number
- Bank Account Type

### Visibility Toggle:

- A **toggle switch** allows Admins or HR to control the visibility of financial information to the employee.
- By default, this is **OFF** (hidden from employees).

- When turned **ON**, selected financial details become visible in the employee portal.

### 3. Emergency Contact Information

- Displays up to **four emergency contact entries** as submitted by the employee.
- Contacts include name, relationship, phone number, and email.
- Admins and HR have view-only access.

### 4. Onboarding Documents

This section manages background checks and employment eligibility:

- **Background Check Completed:**
  - Options: **Yes / No / Not Available**
  - Set manually by Admin or HR based on external verification.
  - A **check date** is automatically recorded in the system.
- **Employment Eligibility Document:**
  - Options: **Yes / No / Not Available**
  - Used to confirm legal work eligibility, validated by Admin/HR.
  - Date of review is also stored and displayed automatically.

## 5. Certification Documents

This section lists all certifications uploaded by the employee:

- Each certification includes:
  - Certification Name
  - Expiration Date
- **Expiration Monitoring:**
  - The system automatically checks for expiration.
  - If expired, a **notification** appears to Admin/HR when they visit the employee's profile.
- **Extension Option:**
  - A **toggle** is provided to grant expiration date extension permission.
  - If enabled, employees can enter a new expiration date.
  - If **not extended**, the system automatically removes the expired certification from the employee's profile.

## Candidate Details Page

The Candidate Details Page provides a comprehensive view of an individual candidate's profile, application details, and additional information. Admins can review candidate information, manage skills, and assess application responses.

### Candidate Information Overview

On this page, the admin can view:

- Full Name
- Phone Number
- State, City, and Zip Code
- Email Address
- Applied Job Title

### Application Details

- **Uploaded Resume** – Admins can access and download the candidate's submitted resume.
- **Cover Letter** – If provided, the admin can review the candidate's cover letter.
- **Candidate Responses** – If the job creator required applicants to answer specific questions, the admin can view the candidate's answers.

### Admin Actions

#### 1. Manage Candidate Skills

- **Add New Skills** – Admins can assign job-related skills to the candidate.
- **Update Skills** – Existing skills can be modified or removed based on evaluation.

The screenshot displays the SoluComp Admin Dashboard. The top navigation bar includes the SoluComp logo, a welcome message to the Admin, and several menu items: Home, Admin Dashboard, Document Library, Job Analytics, Paused Jobs, and Inactive Users. The left sidebar lists various admin functions: Overview, Manage Jobs, Manage Candidates, Manage Employees, Create Users, Manage Users, Skills, Predefined Question, and Profile. The main content area shows the profile of a user named Ali Arslan. It includes contact information (Phone: 03137909583, State: N/A, City: LA, Zip Code: N/A, Candidate Email: ali@admin.com), application details (Applied at Ai Engineer - February 13, 2025), and a note that no resume is available. There are two interactive boxes: 'Add Skills' (showing 'React native, laravel 9') and 'Update Application Status' (showing 'Hired - 4/22/2025'). Below this is a 'Cover Letter' section with a text area containing 'kj'. At the bottom, a 'Candidate Responses' section shows 'No candidate responses available.' A copyright notice '© All Rights Reserved SOLUCOMP - A Solution Company' is visible above the footer.

## Create User

The Create User page allows admins to manually add new users to the job portal by providing essential details, including personal information, contact details, and login credentials.

### User Information Fields

When creating a new user, the admin must fill in the following fields:

#### 1. Personal Details

- First Name – Enter the user's first name.
- Last Name – Enter the user's last name.
- Email Address – Provide a valid email for account access.
- Phone Number – Enter the user's contact number (e.g., +15551234567).

## 2. Additional Contact Information

- Good Time to Call – Select a preferred time for communication.
- State – Enter the state where the user resides.
- City – Enter the user's city.
- Zip Code – Provide the postal/zip code of the user's location.
- Time Zone – Select the user's time zone for scheduling purposes.

## 3. Account Security & Credentials

- Password – Set a secure password for the user.
- Confirm Password – Re-enter the password to confirm.

## 4. Profile Picture

- Upload Profile Photo – Admin can upload a profile image for the user.

The screenshot displays the SoluComp Admin Dashboard. The top navigation bar includes the SoluComp logo, a welcome message to the Admin, and several menu items: Home, Admin Dashboard, Document Library, Job Analytics, Paused Jobs, Inactive Users, and Logout. The left sidebar lists various dashboard options, with 'Create Users' highlighted in blue. The main content area is titled 'Create User' and features a circular profile picture placeholder with a 'Click to Upload' button. Below this, there are input fields for 'First Name', 'Last Name', 'Email Address', 'Phone Number', 'Good Time to Call' (a dropdown menu), 'State', 'City', and 'Zip Code'. The 'Phone Number' field is pre-filled with '+1 2345678901'. At the bottom of the page, a copyright notice reads '© All Rights Reserved SOLUCOMP - A Solution Company'.

## Manage Users

The **Manage Users** page allows administrators to oversee all registered users in the system. Admins can view, filter, and manage user accounts, including activating or deactivating user access.

## Displayed User Information

Each registered user is listed with the following details:

- **Name** – The full name of the user.

- **Email** – The registered email address.
- **Phone Number** – The contact number of the user.

## Admin Functionalities

### 1. User Filtering & Search

- Admin can filter users by **name** to quickly find specific users.

### 2. User Account Management

- **Deactivate Users** – Admin can mark any user as **inactive**, preventing them from logging into the system.

### 3. View User Details

- Clicking on a user's **name** opens the **User Details** page, where admins can view complete profile information.

The screenshot displays the SoluComp Admin Dashboard. The top navigation bar includes the SoluComp logo, a welcome message to the Admin, and several menu items: Home, Admin Dashboard, Document Library, Job Analytics, Paused Jobs, Inactive Users, and Logout. A sidebar on the left lists various dashboard sections, with 'Manage Users' currently selected. The main content area is titled 'Manage Users' and features a search bar with a 'Select User' dropdown and a 'Clear' button. On the right side of the table, there are buttons for 'Add New User' and 'Inactive'. The table itself lists 10 users with columns for selection, ID, Name, Email, and Phone Number. The 5th user, 'Rabada Live', is highlighted in grey.

## Skills Management

The **Skills Management** module allows administrators to define and manage skills required for job postings. These skills are selectable when creating or editing job posts.

- **Add Skills** – Admin can create new skills, which will be available for selection in job postings.
- **Edit Skills** – Modify existing skills if any updates or corrections are needed.
- **Delete Skills** – Remove skills that are no longer relevant.

### Skills Usage:

- When an admin posts a new job, they can select from the predefined skills.
- These skills help filter candidates based on their qualifications.
- Skills are also used in the **Manage Candidates** section to evaluate applicants.

The screenshot displays the SoluComp Admin Dashboard. The top navigation bar includes a welcome message for 'Admin' and buttons for Home, Admin Dashboard, Document Library, Job Analytics, Paused Jobs, Inactive Users, and Logout. The left sidebar lists various admin functions, with 'Skills' highlighted. The main content area is titled 'Global Skill Set Management' and features a table of predefined skills. An 'Add Skill' button is located in the top right corner of the table area.

| Skill                                                   |   |
|---------------------------------------------------------|---|
| React native OK                                         | ⋮ |
| Django                                                  | ⋮ |
| Laravel 11 Developer                                    | ⋮ |
| Ai Engineer                                             | ⋮ |
| ML                                                      | ⋮ |
| Scrapping                                               | ⋮ |
| Docker                                                  | ⋮ |

## Question Management

The **Question Management** module enables administrators to define job-related questions. These questions appear when candidates apply for jobs.

- **Add Questions** – Create custom questions that candidates must answer while applying.
- **Edit Questions** – Modify existing questions for better clarity or relevance.
- **Delete Questions** – Remove outdated or unnecessary questions.

### Question Usage:

- During job creation, admins can choose from predefined questions or add new ones.
- Candidate responses are stored and visible in the **Candidate Details** page.

## Admin Profile Management

The **Profile Management** module allows the admin to update their personal and account-related details.

- **Update Personal Information**
  - First Name
  - Last Name
  - Email Address
  - Phone Number
  - Time Zone
  - Address (State, City, Zip Code)
- **Update Profile Picture**
  - Admin can upload or change their profile photo.
- **Change Password**
  - Admin can update their password for account security.

## Document Library Module

The **Document Library** module allows Admins and HR personnel to upload, categorize, and manage important company documents. These documents serve as reusable assets and can later be assigned to candidates during onboarding or throughout their employment lifecycle.

### Key Features

- Upload single or multiple documents of various formats.
- Categorize each document into predefined types.
- View all uploaded documents with filters for general and policy-based classification.
- Assign uploaded documents to candidates via the **Assigned Documents** section.
- Track total uploaded document count and recent uploads.
- Search documents by name for quick access.

### Upload New Documents

When the "**Upload New Documents**" button is clicked, the following workflow is triggered:

#### 1. File Selection

- Supports **multiple file uploads** simultaneously.
- Valid document types include: PDF, DOC, DOCX and common image formats.

## 2. Mandatory Category Assignment

- Each document must be assigned a category before upload.
- Available categories:
  - Employment Eligibility
  - Employment Withholding
  - Background Check Authorization
  - Vehicle Usage Consent Form
  - Assigned Tools
  - Company Assets
  - Company Policy Documents

## 3. Upload Action

- Once files and categories are selected, clicking **Upload** stores the documents in the system.
- Successfully uploaded documents become available under relevant sections and may be assigned to candidates.

## Document Viewing & Organization

The Document Library interface provides two main viewing tabs:

### 1. All Documents

- Displays **all uploaded documents** across categories such as:
  - Company Assets
  - Vehicle Usage Consent Forms
  - W-4 Forms
  - Assigned Tools
  - General Reference Documents

- Includes:
  - **Search bar** to filter documents by name
  - **Document count** displayed at the top of the page
  - **Recent Uploads** section showcasing the latest added documents

## 2. Company Policies

- Displays only documents categorized under **Company Policy Documents**
- Includes:
  - **Search bar** to find policy documents by name
  - Table listing document name, upload date, size and category

## Integration with Assigned Documents Module

- All documents uploaded to the Document Library are **instantly accessible** within the **Assigned Documents** feature on candidate profiles.
- Admins/HR can select from this pool when assigning onboarding tasks or policy acknowledgments.

The screenshot displays the SoluComp Admin Dashboard. The top navigation bar includes the SoluComp logo, a welcome message to the Admin, and links for Home, Admin Dashboard, Document Library, Job Analytics, Paused Jobs, Inactive Users, and Logout. The left sidebar lists various admin functions: Overview, Manage Jobs, Manage Candidates, Manage Employees, Create Users, Manage Users, Skills, Predefined Question, and Profile. The main content area is titled 'Document Library' with the subtitle 'Manage, organize, and share important documents with your Candidates'. It features two summary cards: '15 Total Documents' and '5 Recent Uploads'. Below these, there are tabs for 'All Documents' and 'Company Policies'. The 'General Documents' section is active, showing a search bar and a list of documents. The documents listed are: 'ccms-v1.0 (1)' (6.9 MB, uploaded Jun 04, 2025, category Employment\_eligibility), 'ADMIN POV TESTING' (44.4 KB, uploaded Jun 04, 2025, category Employment\_eligibility), 'Assigned Tools' (10.2 MB, uploaded Apr 19, 2025, category Assigned\_tools), and 'Company-Assets' (85.7 KB, uploaded Apr 16, 2025, category Company\_assets). Each document card includes a file icon, title, upload date, size, and category label. The footer states '© All Rights Reserved SOLUCOMP - A Solution Company'.

## Paused Jobs

The **Paused Jobs** module allows admins to manage jobs that have been deactivated (paused) by an admin. These jobs are not visible to candidates until restored.

### Admin Functionalities in Paused Jobs:

- **View All Paused Jobs** – Displays a list of all jobs that are currently inactive.
- **Restore Jobs** – Admin can reactivate a paused job, making it available for candidates again.
- **Delete Jobs** – Admin can permanently remove a paused job from the system.
- **View Job Details** – Clicking on a job title allows the admin to view all details related to that job.

## Inactive Users

The **Inactive Users** module allows admins to manage users who have been deactivated, meaning they can no longer log in to the system.

### Admin Functionalities in Inactive Users:

- **View All Inactive Users** – Displays a list of users who have been disabled.
- **Restore Users** – Reactivate a user so they can log in and access the platform again.
- **Delete Users** – Permanently remove a user from the system.
- **View User Details** – Clicking on a user's name allows the admin to see their profile and related information.

# Appendix

## Libraries & Tools Used

This project utilizes the following libraries and tools to ensure performance, security, and user experience:

### Bootstrap 5

- **Description:** A front-end CSS framework used for building responsive and mobile-first layouts.
- **Usage:** Powers UI components across both candidate and admin dashboards.
- **Reference:** Bootstrap © 2025 [www.SoluComp.com/JobFinder](http://www.SoluComp.com/JobFinder) v1.0

### FontAwesome

- **Description:** Icon library integrated across the system for button actions, indicators, and navigation visuals.
- **Usage:** Used within buttons, status icons, and UI elements throughout the platform.

### Laravel File Storage

- **Description:** Laravel's native file handling system.
- **Usage:** Handles upload and retrieval of resumes, certification documents, and assigned HR materials.

### Google reCAPTCHA v2

- **Description:** Spam protection and bot detection tool.
- **Usage:** Integrated in the login and signup flows to prevent automated access.

### tsParticles

- **Description:** A JavaScript animation library.
- **Usage:** Adds particle celebration effects when a candidate successfully completes onboarding.

## Chart.js

- **Description:** JavaScript charting libraries for analytics visualization.
- **Usage:** Used in Admin Dashboard for reporting application trends, traffic analysis, and performance metrics.

## Version History

### Version 1.0 – © 2025 [www.SoluComp.com/Job-portal](http://www.SoluComp.com/Job-portal)

- Initial release of **Job Finder v1.0**.
- Includes complete user and admin modules: job application, onboarding, emergency contact consent, resume management, document assignment, and analytics.
- Features dynamic dashboards, onboarding workflows, a fully integrated document library, and real-time validation.
- Optimized for mobile and desktop interfaces using Laravel & Bootstrap stack.

## Conclusion

**Job Finder v1.0** provides a modern, secure, and user-centric platform to streamline the hiring process—from job posting to onboarding. With its modular design, intuitive UI, real-time tracking, and role-based access, it empowers both candidates and employers with clarity, control, and compliance.

The system is engineered for scalability and adheres to best practices in Laravel development, data validation, and user experience. With future-proof features like the Document Library and Onboarding Progress tracking, **Job Finder v1.0** lays a solid foundation for digital hiring operations.
