PROFESSIONAL SUMMARY

PHP/Laravel Developer with 3 years of experience building secure, high-performance web applications. Specialized in architecting multi-tenant SaaS platforms, RESTful APIs, and OAuth 2.0/SSO integrations. Proven track record of optimizing database performance by 45% and automating complex business logic to reduce operational costs. Committed to clean code, SOLID principles, and TDD.

EDUCATION

The Islamia University of Bahawalpur, Pakistan
Bachelors Computer Science (2024)

TECHNICAL SKILLS

Back-End:	PHP, Laravel, OOP, SOLID Principles, RESTful APIs, Eloquent, Queues & Jobs
Database Design & Optimization:	MySQL, Redis, Query Optimization, Eager Loading (N+1 fixes).
Security & APIs:	OAuth 2.0/SSO, JWT, WebSockets (Pusher), Microsoft Graph API, TOTP/2FA.
Tools & DevOps:	Cpanel, Linux, Git, GitHub, Postman, Laravel Telescope, PHPUnit (Feature Testing).
Front-End:	HTML, CSS, Bootstrap, JavaScript, React (Familiar)

PROFESSIONAL EXPERIENCE

Laravel Developer

Surfiq Technologies – Lahore, Pakistan | 2024 - 2026

- **Architected a unified SSO ecosystem** for enterprise applications using OAuth 2.0 and JWT, centralizing authentication for daily active users and improving cross-platform security.
- **Engineered a multi-gateway subscription engine** by integrating PayPal alongside Stripe, architecting a flexible driver-based system that supports dynamic provider selection and automated plan synchronization.
- **Spearheaded the transition to a Zero-Trust security model** by integrating mandatory TOTP 2FA and architecting a secure JWT rotation/refresh mechanism.
- **Architected a granular RBAC system** using Laravel Gates and Policies to enforce strict multi-tenant data isolation across diverse companies and geographic regions.
- **Developed a real-time event-driven architecture** using WebSockets (Pusher) for **1:1/group chats**, and live notifications, increasing decision-making speed by 25%.
- Automated the processing of thousands of monthly excel records by implementing a distributed **Queue/Job system**, reducing manual data entry by 70% and ensuring 99.9% processing accuracy.
- **Automated a hardware-to-software mapping engine** for Siena Routers and Samsung VDUs, reducing manual configuration time by 60% and eliminating human error in network provisioning.
- Reduced API latency by 45% through strategic Eager Loading (preventing N+1 issues) and Redis caching, while integrating **Microsoft Graph API** to automate Teams conferencing workflows.

Freelance Web Developer

Self-Employed | 2023- 2024

- Architected a Laravel-based logistics engine featuring a **7-stage finite state machine** to automate data extraction from HTML receipts; reduced manual overhead by 90% and achieved **100% end-to-end traceability** from warehouse to installation.
- Developed a full-stack Job Portal with a **secure document management workflow** implemented advanced filtering logic that streamlined candidate screening for small-to-medium enterprise clients.
