PROFESSIONAL SUMMARY

Performance-oriented PHP/Laravel Developer with 2 years experience building secure, high-performance web applications. Skilled in architecting multi-tenant platforms, complex business logic, RESTful APIs, OAuth 2.0/SSO and third-party integrations. Adept at optimizing databases with Redis and eager loading, and developing real-time features using WebSockets. Known for clean, testable code and a strong critical-thinking mindset.

EDUCATION

The Islamia University of Bahawalpur, Pakistan

Bachelors Computer Science (2024)

TECHNICAL SKILLS

Back-End:	PHP, Laravel, OOP, SOLID Principles, RESTful APIs, Eloquent, Queues & Jobs
Database Design & Optimization:	MySQL, PostgreSQL, SQLite, Redis, Query Optimization, Eager Loading.
Integrations & Microservices:	Third-Party API, Microsoft Graph, OAuth 2.0/SSO, JWT, WebSockets (Pusher).
Architecture & DevOps:	Multi-Tenant Systems, Microservices Concepts, Git, GitHub, CI/CD
Testing & Tooling:	PHPUnit, Postman, Laravel Telescope
Front-End:	HTML, CSS, Bootstrap, JavaScript/jQuery, React (Familiar)

PROFESSIONAL EXPERIENCE

Laravel Developer

Surfiq Technologies – Lahore, Pakistan | 2024 - Present

- **Architected** and scaled a multi-application SaaS platform connecting a central CCMS with five enterprise apps via a unified Auth Center, supporting high-traffic usage with seamless SSO.
- **Engineered** a granular RBAC system with delegated company/state permissions and comprehensive activity logging, ensuring strict access control across the platform.
- **Implemented** secure token refresh and TOTP 2FA, eliminating repeated logins and reducing unauthorized access incidents by 100%.
- **Designed interactive dashboards and sales metrics modules**, providing managers with actionable insights on pipeline, salesleads conversions, approvals, and team productivity, improving decision-making speed by 25%.
- **Built** real-time chat, notifications, and approval workflows using Pusher WebSockets, enhancing collaboration and user engagement.
- **Reduced** manual data processing workload by 70% by automating the ingestion and mapping of millions of records from large-scale files.
- **Implemented complex backend logic** for mapping connections between Siena Router and Samsung VDU, automating assignments, cutting processing time by nearly half, and reducing operational costs by 40%.
- **Enhanced** system performance and data consistency for high-concurrency loads by optimizing queries with Eloquent eager loading, caching with Redis, and orchestrating cross-domain user synchronization via Laravel queues.
- **Integrated** Microsoft Graph API for Teams to automate conferencing workflows, saving hours of manual coordination weekly.

Freelance Web Developer

Self-Employed | 2023- 2024

- **Engineered** a custom inventory management module for a Laravel e-commerce site, reducing manual data entry by 95% and eliminating stock discrepancies by automating synchronization with a third-party supplier API.
- **Developed** a full-stack Job Finder SaaS platform that streamlined HR workflows, decreasing the client's average time-to-hire by 30% through integrated applicant tracking, document management, and onboarding modules.
- Optimized database queries and implemented caching strategies, improving application performance and reducing server load.
