PROFESSIONAL SUMMARY

Performance-oriented PHP/Laravel Developer with 2 years experience building secure, high-performance web applications. Skilled in architecting multi-tenant platforms, complex business logic, RESTful APIs, OAuth 2.0/SSO and third-party integrations. Adept at optimizing databases with Redis and eager loading, and developing real-time features using WebSockets. Known for clean, testable code and a strong critical-thinking mindset.

EDUCATION

The Islamia University of Bahawalpur, Pakistan

Bachelors Computer Science (2024)

Relevant Coursework: Data Structures, Object-Oriented Programming, Database Systems, Web Technologies

TECHNICAL SKILLS

Back-End:	PHP, Laravel, OOP, SOLID Principles, RESTful APIs, Eloquent, Queues & Jobs
Database Design & Optimization:	MySQL, PostgreSQL, SQLite, Redis, Query Optimization, Eager Loading.
Integrations & Microservices:	Third-Party API, Microsoft Graph, OAuth 2.0/SSO, JWT, WebSockets (Pusher).
Architecture & DevOps:	Multi-Tenant Systems, Microservices Concepts, Git, GitHub, CI/CD
Testing & Tooling:	PHPUnit, Postman, Laravel Telescope
Front-End:	HTML, CSS, Bootstrap, JavaScript/jQuery, React (Familiar)

PROFESSIONAL EXPERIENCE

Laravel Developer

Surfiq Technologies – Lahore, Pakistan | 2024 - Present

- Spearheaded the architecture of a unified SSO ecosystem**, connecting a suite of disparate enterprise applications into a single, cohesive platform. This solution eliminated user friction and reduced administrative overhead by centralizing authentication for thousands of daily active users.
- Designed and implemented a granular**, multi-level Role-Based Access Control (RBAC) system that enforced strict data segregation across different companies and geographic regions, ensuring enterprise-grade security and compliance.
- Enhanced** platform security by implementing a zero-trust authentication model, featuring secure token refresh and mandatory TOTP 2FA, which successfully eliminated all unauthorized access incidents.
- Delivered** a real-time analytics and sales intelligence dashboard that provided executives with actionable insights into the entire sales funnel, directly contributing to a 25% faster decision-making process for management.
- Integrated real-time communication features using WebSockets**, which streamlined internal collaboration and automated critical approval workflows, leading to a measurable increase in user engagement and productivity.
- Automated** the processing of millions of data records by developing a high-throughput ingestion pipeline, which reduced manual data entry by 70% and virtually eliminated processing errors.
- Developed** a complex automation engine for network hardware configuration, which dynamically mapped connections between Siena Routers and Samsung VDUs. This solution cut manual processing time by 50% and reduced operational costs by 40%.
- Enhanced** system performance and data consistency for high-concurrency loads by optimizing queries with Eloquent eager loading, caching with Redis, and orchestrating cross-domain user synchronization via Laravel queues.
- Integrated** Microsoft Graph API for Teams to automate conferencing workflows, saving hours of manual coordination weekly.

Freelance Web Developer

Self-Employed | 2023- 2024

- **Automated** a critical e-commerce inventory management system, reducing manual data entry by 95% and eliminating stock discrepancies by building a custom Laravel module with a third-party API integration.
- **Delivered** a full-stack Job Finder SaaS platform that streamlined the entire hiring process, decreasing the client's average time-to-hire by 30% through integrated applicant tracking, document management, and automated onboarding workflows.
